StealthNet is installed in the trailer or chassis bogie area.

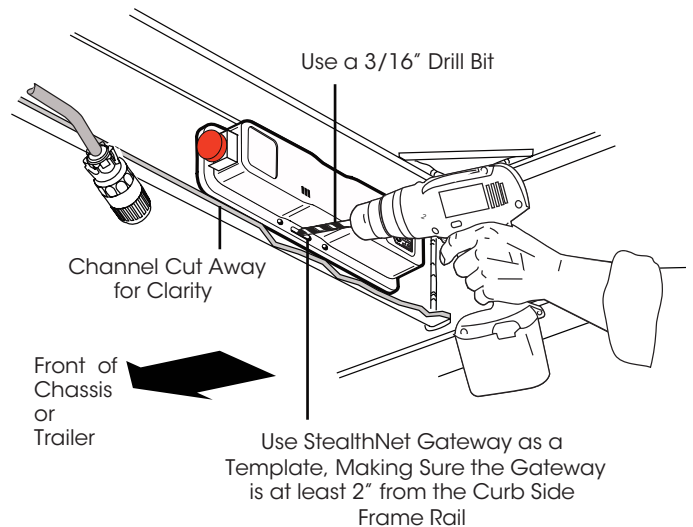

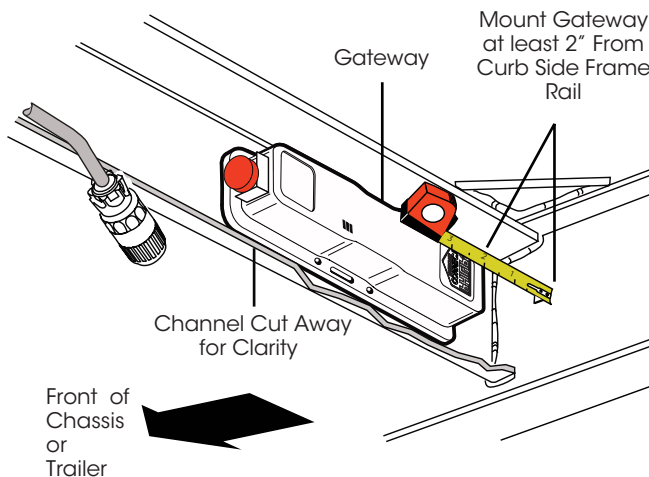

Professional Installation Recommended - Installation of StealthNet is recommended to be installed by a professional installer that has sufficient technical knowledge and expertise for mobile device installation and integration with commercial assets. i.e. Certified Geotab Installer certification or equivalent.

IMPORTANT: If the unit has a sliding tandem, install on the rear of a crossmember in the sliding tandem

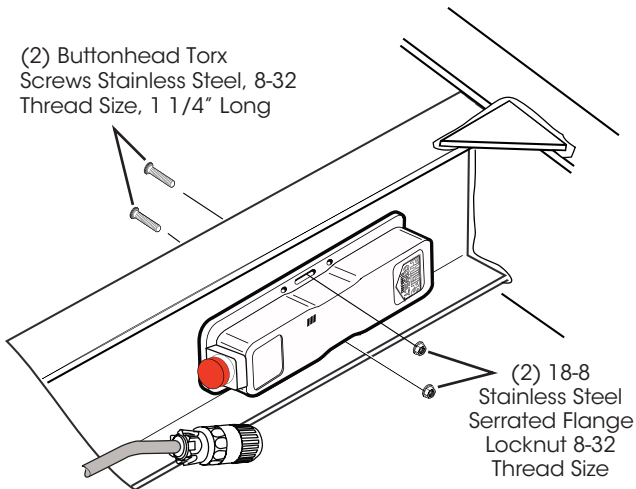

1. Mount at least 2 inches from the frame rail so the StealthNet Gateway has a clear view to the ground.

2. Using the StealthNet Gateway as a template, mark and drill two (2) 3/16" holes as shown.

3. Insert supplied 8-32 button head screws from the front side and secure with 8-32 serrated flange nuts.

Connection

7. Match the colored wires as shown below. Plug the three (3) male .180" bullet connectors on the Power Extension Harness (currently connected to the Gateway) into the three (3) female .180" bullet connectors on the ABS Jumper Harness (currently installed on the main harness).

8. Secure all loose harnesses with the included cable ties. Use side cutter to cut back excess cable ties.

Notice: Once installed, do not pressure wash the device or the immediate surrounding area.

9. Power up the asset.
